

Archival Pigment Giclée Prints • Fine Art Trade Guild Certified Cotton Rag Prints • Oil Pigment Archival Canvases

Prices include optional image optimisation and online proofing, custom fine art borders and canvas wrap layouts

All our prints and canvases are produced on 'Museum Standard' Giclee printers. Printing up to 44 inches wide at 2,880 dpi these units use fine art UltraChrome® oil based pigments to achieve a full range, photographic 'gamut' with high saturation. The Wilhelm Institute's accelerated fading tests have predicted an indoor display life of over 75 years for colour prints on acid free media & over 100 years with archival matt and fine art rag paper: See the www.wilhelm-research.com website for more information. **We do not 'switch' archival UltraChrome pigments with low cost Korean 'copy' inks!**

Professional Scans MAKE the print! We can scan, 'Digitally Master' and fully retouch ALL film formats up to 6,000dpi for richly toned, blemish free prints.

Supplied Files: Should be **Adobe RGB** for pro printing. (sRGB is for web & kiosk prints.) PSD, TIF, or compressed JPG (Don't go below PhotoShop level 7)

Resolution: Images up to A3 can be 200 - 360dpi, A2, 150 - 200dpi and A1 - A0, 120 - 150dpi. If in doubt call us for advice. Low resolution files can be enlarged with our 'Spline & Fractal' software but you won't get detail that is not there. Always shoot maximum resolution RAW or Adobe RGB, TIF.

Colour Matching: We check every image and consult before printing but **for critical artwork colour matching and large print runs you should order a proof first...**

Approval Proofs: Our 7" x 22" and 7" x 44" proof strips can be multiple images or a reduced 'total image' plus a 100% section to evaluate sharpness.

Artwork Matching: We can adjust individual colours and tones for critical matching to original artworks (after proofing): Charged per minute: **\$2.20 inc. GST**

Canvas Prints are more suited to A3 and larger images due to the canvas weave. **We add a 56mm border for frame stretching:** 38mm is used for the side wrap' around the 38mm wooden frame stretchers and 18mm is used for back stapling. **We don't use flimsy 25mm frame stretchers.**

Unframed Canvases. Are printed with custom 'wrapping' borders, frame guides and shipped rolled. Just specify 1.5" / 38mm stretcher frames to your framer.

5 Coats of Crystal Clear UV Giclee Lacquer. This extends fade resistance to 85+ years and provides abrasion resistance, UV and mould protection.

Professional Canvas Framing. **We don't use budget 'stretcher bar kits' that loosen with age.** Our frames are custom built by our services agents who are fine art framing specialists. They build **heavy duty 38mm, seasoned wood frames** finished with paper sealing, adjustable hangers and wall bumpers.

Paper & Rag Print Borders: All sizes are 'trimmed paper' dimensions with a **5mm white 'handling' border.** Consider making a layout template yourself....

We suggest that you choose a larger paper size to including at least a 30mm white presentation and handling border around your image. Pro Photographers usually add a fine black keyline to images and a large 30-100mm border for 'presentation space', image title, signature and professional 'mat overlay' framing.

Borderless Printing Systems enlarge images to 'run off' the paper giving unwanted cropping so it is better to order with the 5mm border and trim after mounting.

Turnaround. 2-3 days for paper & rag prints. 3 days for canvas including pigment curing and coatings. 3-4 days for framing. Times may vary with workload.

Standard 'A' sizes and Traditional Photo Sizes.
Archival Giclee Papers & Cotton Rag Prints...
Archival Cotton Canvas + 4 coats of UV/abrasion resistant lacquer...

Medium weight archival smooth matte exhibition paper or...

Medium weight archival premium gloss or lustre photo paper or...
